Chief, Regulations Control Staff

AUG 2 1954

Asst. Management Officer, DD/A Area

Revisions of Logistics Office Organization Chart

1. The chart on Page 9 of Regulation should be changed to reflect the following:

25X1

a. The Policy Planning Staff and Inspection and Review Staff have been consolidated into a Technical Review and Policy Staff.

b. The security function has been removed from the Administrative Staff and the Security Staff reporting to the Chief of Logistics has been established.

c. The Coordination and Requirements Staff should be eliminated from the chart and a Planning Staff shown in lieu thereof.

2. The need for a Policy Planning Staff as a separate organizational element no longer exists and for that reason the functions of that Staff and Inspection and Review Staff have been consolidated in what will be known as the Technical Review and Policy Staff. The security function has never in actual fact reported to the Chief of the Administrative Staff but instead has been directed by the Chief of Logistics. The Coordination and Requirements Staff no longer needs to conduct a coordination operation as extensive as has been needed in the past and the routine requirements work has been transferred to the Supply Division. Therefore the Staff becomes more of a pure planning function and should be designated Planning Staff.

3. No changes are required in the mission and function statements for the Logistics Office.

4. The changes outlined above are included in an OAM study dated June 30, 1954 concurred in by Mr. Garrison and approved by the Deputy Director (Administration). The signed copy of the study is in the custody of Classification and Wage Division, Office of Personnel.
